AGRONOMY AND FORESTRY | ERRATUM

ERRATUM

In the article *Goupia glabra* does not recover its timber stock after a 35-year logging cycle in the Brazilian Amazon: evidence from long-term multi-area monitoring, with DOI: 10.1590/1809-4392202302191, published in the journal Acta Amazonica 54: e54ag23219, on page 02:

Where it reads:

"Simulations involving *Dipteryx odorata* Aubl. Willd. and *Manilkara elata* (Allemão ex Miq.), both widely commercialized in Brazil, have shown that they require at least 160 and 601 years to recover, respectively (Braz and Mattos 2015; Ferreira *et al.* 2020)."

Please read as:

"Simulations involving *Dipteryx odorata* Aubl. Willd. and *Manilkara elata* (Allemão ex Miq.), both widely commercialized in Brazil, have shown that they require at least 160 and 601 years to recover, respectively (Vinson et al. 2015; Ferreira *et al.* 2020)."
